Comments: This Chemical Vapor Deposition (CVD) laboratory grown

diamond is classified as Type IIa.

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and capacitated by International Gemological Intellitud (GIO). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being mon-made (a manufactured product). LGD's are stylically produced by CVD (chemical vapor deposition) or by IHHI (high pressure high temperature) growth processes and may include post growth modifications to change the color. Glutilitizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including. FIRI, UV-VIS-NIQ, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor approxisal and by making the report (GI does not gare to such cape or to guarantee, valuation nor approxisal and by making the report (GI does not gare to such cape or report is neither a guarantee, valuation nor approxisal and by making the report (GI does not gare to such capes or response the article.
