Comments: This Chemical Vapor Deposition (CVD) laboratory grown

diamond is classified as Type IIa.

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and capacitated by International Gemological Intellute (LGD). A LGD has essentially the chemical, physical and optical properties as a mined diamond, with the exception of being mon-made (a manufactured product). LGDs are stylically produced by CVD (chemical vapor deposition) or by IHHR (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGL titilizes the most advanced techniques and equipment currently available including, binocular microscopes, diamond color masters, non-contact-optical measuring device, a wide range analytical techniques including. FIRI, UV-VIS-NIQ, raman spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report includes advanced security features. This Report is neither a guarantee, valuation nor approxisal and by making the report IGI does not gare to auchorse or resolate the article.
