Comments: This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa.

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Lasserstice#0% by International Gemological Intitule (Gi), A LGD has sessifially the chemical, physical and optical properties as a mined diamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. (Gi utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamond color masters, non-contoct-optical measuring device, a wide range analytical techniques including FIIR, UV-VIS-NIR, uranna spectroscopy, and fluorescence analysis at various excitation availangths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or opprivation and by making the report IG does not agree to purchase or replaces the articles.
