The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation. 10X magnification, corrected inject louge, binocular microscopp, master color or with passes afters, non-contact-optical inject lough, by the cular microscopp, master color with passes afters, non-contact-optical inject lough, by the cular microscopp in the passes of the passes of the color of the
